

LETTER OF ANNOUNCEMENT
OPB portal system release 6.2

21st March 2019

Dear all,

EMVO is contacting you regarding the release of the OPB portal system 6.2, which will be implemented this Saturday, March 23rd.

The deployment process will last approximately 12 hours. Therefore, OPBs will not be able to make changes on the OPB portal during this time. Any changes made on the portal between March 23rd 00:00 and March 23rd 23:59 will not be successful.

Main changes related to the previous versions consist in:

- Changing the step labels so that the OBPs will have a more intuitive and clear understanding of what the step is about
- Changing the step status labels
- Other administrative upgrades which will not impact the user experience of OBPs.

Further information regarding the changes will be provided through the EVI communication tool on the EMVO website. We encourage you to check the EVI entry related to the deployment of the OPB portal release 6.2.

Once the release has been successful, we will release a further communication.

If you have any further questions, please be assured that EMVO's Helpdesk (helpdesk@emvo-medicines.eu) remains at your disposal.
